OVERVIEW

- **Career Objective:** Analytical, flexible, autonomous graduate in Computer Science looking to leverage experience building responsive and scalable web applications to solve problems that delight end-users. Motivated to learn from senior engineers while sharing innovative ideas in an environment that values personal growth.

EDUCATION

- **American International University-Bangladesh (AIUB)** 408/1, Kuratoli, 1229
• *B.Sc in Computer Science and Engineering* Jan 2015 - Apr 2019
Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Networking, Databases

SKILLS SUMMARY

- **Languages:** JavaScript, PHP, TypeScript, SQL, C & C++
- **Frameworks:** Laravel, React JS, Angular JS
- **Database:** MySQL, MariaDB, SQLite, Oracle
- **Platforms:** Web, Arduino, Raspberry Pi
- **Skills:** HTML, CSS, JQuery, Bootstrap, API & Ajax
- **Tools:** GitHub, GitLab

EXPERIENCE

- **DebugVision** Dhaka
• *Software Engineer* Jan 2024 - Ongoing
 - Developed and maintained management systems, conducted client meetings to gather requirements, and implemented role-based access control for security. Optimized database performance and collaborated with teams to streamline deployments and enhance system reliability.
- **TechWeb BD IT** Dhaka
• *Software Engineer* Feb 2022 - Dec 2023
 - Worked closely with clients to conceptualize and develop system architecture, ensuring efficient workflow and functionality. Standardized deployment procedures and created documentation to enhance project maintainability.
- **Avanteca Limited** Dhaka
• *Software Engineer* May 2020 - Jan 2022
 - Developed customized IT solutions and enhanced in-house systems to improve efficiency and performance. Utilized PHP, SQL, JavaScript, and other backend technologies to strengthen system capabilities.

PROJECTS

- **Hospital Management System (Laravel, PHP, MySQL, JQuery):** Developed a comprehensive hospital management system in Laravel and PHP, integrating key modules for seamless healthcare operations.
 - The system includes functionalities such as appointment scheduling, doctor and nurse management, patient admission, billing, and pharmacy management. Additionally, optimized modules for OPD, IPD, accounts, and patient records to ensure an efficient hospital workflow. To enhance security and accessibility, implemented role-based access control, ensuring proper data management and user permissions across different departments.
- **E-commerce Websites (Laravel, PHP, MySQL, JQuery):** Designed and implemented API-based E-commerce solutions in Laravel and PHP, elevating the user experience and optimizing order management. Notable projects include:
 - **SkyBuyBD:** Spearheaded the development of features enhancing the online shopping journey, focusing on performance and scalability in Laravel. Implemented live order tracking to provide real-time updates to customers.
 - **DearBD:** Played a pivotal role in building the complete management system, streamlining backend processes and ensuring efficient order fulfillment using PHP and Laravel.
- **Government Certificate System (Laravel, PHP, MySQL, JQuery):** Led the development of a robust online certificate system in Laravel, contributing to secure and efficient document processing. Notable project:
 - **UDCBD:** Pioneered the end-to-end development of the UDCBD website, a Government Certificate System. Engineered secure functionalities in Laravel and MySQL, ensuring compliance with government standards. Optimized the certificate issuance process for enhanced administrative efficiency.
- **Inventory Management System (Laravel, PHP):** Led the end-to-end development of an advanced Inventory Management System in Laravel and PHP, encompassing warehouse management, stock control, and Point of Sale (POS) functionalities.
- **Web Content Management System (Laravel, PHP):** Engineered a sophisticated WCMS in Laravel and PHP, facilitating seamless content editing through a browser-based interface.
 - Led comprehensive content maintenance and precise layout control for various projects.
 - Contributed significantly to streamlined content management, enhancing user experience and website performance.
